Goat's Milk Esbilac® Liquid

Milk Formula for Puppies with Sensitive Digestive Systems

Recommended as a complete food source for orphaned or rejected puppies or those nursing, but needing supplemental feeding. Also recommended for growing puppies or adult dogs that are stressed and require a source of highly digestible nutrients.

- Formulated to provide a caloric pattern similar to bitch's milk in protein fat and carbohydrates.
- Supplies necessary vitamins and minerals to ensure proper development and growth.
- Easy to digest, highly palatable, ready to feed formula.
- Ideal supplement for post-surgery and convalescence.

DIRECTIONS FOR USE: ORPHANED

PUPPIES: All puppies should receive their mother's milk for at least 2 days, if possible. The colostrum milk gives extra nutrition and temporary immunity against some diseases. **GME Liquid may be fed at the daily rate of 2 tablespoons per 4 ounces body weight. The daily feeding rate should be divided into equal portions for each feeding.**

Puppies' needs will vary and this amount may have to be increased or decreased, depending on the individual. Small or weak puppies may need to be fed GME Liquid every 3 or 4 hours, while larger puppies do well when fed GME Liquid every 8 hours. Weigh the puppy daily to assure adequate feeding.

Consult your veterinarian for additional advice. GME Liquid should be fed at room or body temperature. When a food supplement is desired for growing post-weaned puppies and show dogs or for old or convalescent dogs, mix GME Liquid into the daily ration at the rate of 1 tablespoon (15 mL) per 5 lbs. (2.2 kg) body weight.

PREGNANT AND LACTATING BITCHES: Mix GME Liquid into the daily ration at the rate of 2 tablespoons (30 mL) per 5 lbs. (2.2 kg) body weight.

Shake well. Refrigerate after opening. To assure freshness discard or freeze within 3 days. Do not freeze in original container.
